Swaged with certified 6/2 lead alloy. We then apply our unique dry-lube formula. This process completely encases the precision lead core.

Safe for indoor ranges. No leading in the barrel. Fire more rounds down-range between cleanings. Load twice as long and twice as much before cleaning your dies. Less smoke since no messy wax lubricants are used.

Precision Bullets cost only a few dollars more than the cheapest cast lead bullets, but they give you jacketed bullet ballistics.

The tough coat protects the bullet from damage and is a natural lubricant. It keeps the bullet at tight factory dimensions and goes through the bore intact.

That means no lead on your hands, no lead dust and no toxic fumes.

Even long sessions at the loading bench or when shooting on indoor ranges. It means clean hands, clean guns, clean reloading dies - and clean air.

And you get a bullet which is highly uniform in weight and dimension.
